

PRODUCT INFORMATION

SWIMMING-POOL RAMP

PRODUCT DESCRIPTION

The efficiency of hydrotherapy is widely recognised by medical professionals, and at Variopool too, we are familiar with this popular form of aquatherapy. The use of movable pool floors and bulkheads is a must to guarantee the best results, as they allow the various target groups to make optimal use of the therapy pool facilities, and they ensure the water temperature can be efficiently regulated.

The movable floor can be equipped with movable stairs, a lift for people with disabilities or a **ramp** to allow rehabilitation patients to access the pool unaided. The ramp is designed for easy access for wheelchair users and others who have difficulty using a ladder or steps.

TECHNICAL SPECIFICATIONS AND FEATURES

Floor panel - walking area

Colour

Handrails

Dimensions

Walking area

Accessible

Max. load

Perforations

** other colours upon request*
