THE REAL DEPTH INVESTMENT

PRODUCT INFORMATION
VARIOPOOL INTEGRATED STAIRCASE

PRODUCT INFORMATION

VARIOPOOL INTEGRATED STAIRCASE

PRODUCT DESCRIPTION

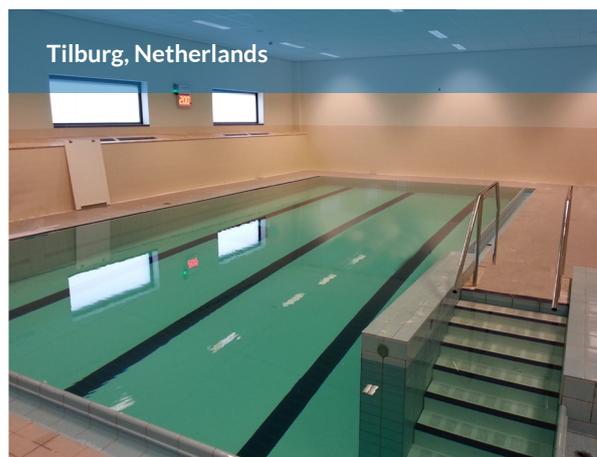

Variopool integrated stairs offer convenience and simplicity for the users when entering the pool. The movable stairs are fully integrated into the movable floor frame construction. The steps will be formed when the Variopool movable floor is lowered and the steps will be flat when the Variopool movable floor is set up at water level. The staircase can be used at any time irrespective of the depth of the movable floor/pool. The staircase can be supplied in a variety of sizes.

The steps are made of non-slip polypropylene material, colour white RAL9010 and the front of each step is supplied with a contrasting warning line. Fixed or pivoting mirror polished 316L stainless steel handrails are also available.

Variopool integrated staircases are designed and manufactured according to local legislation and the European norms 13451-11 specifying hygiene and safety for swimming pool equipment.
